

VEO-SWC44TU

SWITCHERS & MATRIXES

USB-C Wireless Transmitter

PRODUCT OVERVIEW

VEO-SWC44TU is an USB-C wireless transmitter that allows participants to easily share content from a laptop or USB-C video device to the VEO-SWC44 base unit. Power is supplied directly through the same connector. It is designed as a cross platform and plug and play device with no additional driver installation needed. This technology allows to start a transmission and begin sharing content by just connecting the dongle into the source and pushing the surface. A LED indicator and a vibration driver, both allow the user to know the status of the dongle at any time.

KEY FEATURES

- BYOM transmitter for VEO-SWC44 base unit.
- Start and stop wireless transmission with a simple touch.
- LED and vibration status indicator.
- Windows and macOS compliant.
- Supports screen sharing in mirror or extended desktop mode.
- No additional driver installation needed.

APPLICATIONS
