

AA-TG

*Optional Tone Generator Input Module for
Atlas Sound AA Series Model AA120M Mixer Amplifier*

AA-TG

AA-TG

Applications

The AA-TG is an accessory input module for the AA120M. When inserted into the AA120M it can be used to generate three different tones or chimes. It is activated via an external contact closure. The AA-TG also has a line out, making it easy to feed signal to another amplifier.
