## Muti-Display Interface Bracket PATENT PENDING

**ACC 600** 

Before beginning assembly...

Please **read entire instruction sheet** and **check the parts list** to ensure that all components have been included.

Recommended tools: Adjustable wrench, Phillips screwdriver

This Peerless product is intended for use with UL approved monitors and TV's only and must be installed by a qualified professional installer.

**IMPORTANT**: It is the responsibility of the installer to verify that the pipe will safely support the combined load of four times all attached hardware and componentry.

- Select the location on the pipe for positioning bracket and position the "U" Bolts over the top as shown. Then attach the bracket underneath with the Hex Nut, lock washers and washers. Note: the direction of the bracket will be UP for mounting to extension columns and DOWN for pipes (as shown). Tighten nuts snugly.
- Fasten Support pipe into bracket until pipe is tight and align notch with hole on bracket or attach the extension column according to the instructions provided with it. Use a level to make sure the column is plumb and make adjustments as necessary.

IMPORTANT: Insert the M5 x 10mm screw in the threaded pipe fitting as directed in the extension column instructions. If you are using an extension pipe without a notch, drill a 11/64 (0.172") dia. hole through the pipe and insert the screw through

the pipe. Failure to do so could cause the assembly to fail.

Now tighten Hex Nuts to a maximum of 25 FP (34NM) so that the lock washer becomes flat. Mount your bracket according to the instructions provided with it.

Parts List		
Description	Qty	Part #
Muti-display interface brkt	: 1	128-1141
Support Pipe 4"	1	139-1083
