

DCT-41

USB to Stereo Audio Amplifier

INTRODUCTION

This unit is designed to handle high-resolution digital audio from your PC/laptop, via USB, for output through a Coaxial or analog mini-jack connection to your amplifier or headphones. A volume knob on the front provides full volume control. This unit supports LPCM 2.0 audio with a maximum sampling rate of 384kHz (24-bit) and connects to a Windows or Mac OSX PC/Laptop via any standard USB 2.0 (or higher) port.

FEATURES

- Output digital audio from your PC/laptop to an audio amplifier or headphones
- Superior USB audio processor supporting up to 384kHz/24-bit sample rate
- Connects to a Windows or Mac OSX PC/Laptop via any standard USB 2.0 (or higher) port
- Powered by the USB port, no external power required
