This document shows how to identify internet radio streams in order to play them in audio streaming players such as Ecler ePLAYER1 or Ecler DUO-NET PLAYER. Few examples are given, but there are a lot of different options. Feel free to find your favourite internet radio websites!

IMPORTANT NOTE:

A valid audio stream looks like this:

http://www.my_favourite_radio.mp3

http://111.111.11.18080

http://listen.radio/rock.m3u

etc.

An address such as "<u>http://www.my_radio.com</u>" is not directly an audio streaming, but a generic website address. This website could include a real audio streaming service, which will have its own URL.

How to discover streaming URLs included in websites:

EXAMPLE 1:

- 1. Open your favourite web browser.
- 2. Type (or search for) a live radio manager website. Listenlive.eu is used in this example.

3. In this website, look for your radio and click on the bitrate. An ".m3u" will be downloaded.
