

10x4 DVI Dual Link Matrix remote control

EXT-DVI-1044DL-KB

Remote control of the GefenPRO 10x4 DVI Matrix using RS-232

Perform all routing on the GefenPRO 10x4 DVI Matrix, from a remote location, via RS-232 using the 10x4 Remote PB Keyboard. The 10x4 Remote PB Keyboard is an exact representation of the front panel push buttons and LED indicators on the 10x4 DVI Dual Link Matrix, providing the same reliable and streamlined routing process from a distance (or as a wireless remote, using the Gefen Wireless RS-232 Extender).

How It Works

Connect the 10x4 Remote PB Keyboard to the GefenPRO 10x4 DVI Dual Link Matrix using an RS-232 cable. Connect the included power supply to the 10x4 Remote PB Keyboard and connect the AC power cord to an available electrical outlet. When used in conjunction with the Gefen RS232 Extender, the GefenPRO 10x4 DVI Dual Link Matrix can be controlled from up to a distance of 1000 feet.

Features

- Identical representation of the GefenPRO 10x4 Dual Link Matrix front panel push button controls
- RS-232 control
- Locking power connector
- Use with Gefen RS232 Extender or Wireless RS232 Extender to control the GefenPRO 10x4 Dual Link Matrix from longer distances

Specifications*

- Power Supply: 5 V DC
- Power Connector: Locking
- Power Consumption: 10 W (max.)
- Operating Temperature: 0 ~ 40 °C
- Dimensions: 11" W x 1.5" H x 4.5" D
