

FC-28

10-port Serial, IR, GPI/O and Relay, PoE Control Gateway

| Ethernet - RJ-45

The FC-28 is a PoE-powered control gateway, capable of plug and play deployment over customer Ethernet LAN for remote control of customer controlled devices via bidirectional RS-232, IR, GPI/O and relay control connections. Multiple control clients can be IP-connected to the FC-28 control gateway for concurrent control of two RS-232, four IR controllable devices, such as AV scalers, video displays, audio amplifiers, DVD players, sensors, screens, shades, door locks, and lighting

FEATURES

2 RS-232 Bi-directional Control Ports - Control a device via bi-directional serial control protocols 4 IR Emitter Control Ports - Control a device via IR control protocols

2 GPI/O Control Ports - Controls a device via general purpose I/O ports, program-configured as digital input, digital output or analog input interface for controlling sensors, door-locks, audio volume and light dim level, or lighting control devices

2 Relay Control Ports - Control a device via relay contact closure, such as scrolling up and down screens, drapes, shades, and blinds

Simultaneous IP Control Communication - With up to 40 IP control clients

IR Sensor Port - Learns commands from IR remotes

Mini USB Port - For firmware upgrades and local technical services

1 Ethernet Control Port - Remote protocol-based control port

PoE Support - Per IEEE 802.3af standard

Built-in Web Pages - Remote browser-based control and support

Easy Installation - Single Ethernet cable wires for communication and PoE powering, and plug & play IP auto-setup deployment for simple and cost-reducing installation
