Ultra HD 1:4 Splitter for HDMI

Hi-Def input to four Hi-Def outputs using HDMI with Ultra HD resolution

The GefenToolBox 1:4 Splitter for HDMI 4K x 2K distributes one Hi-Def A/V source to four Ultra HD displays simultaneously, without loss of quality or resolution. This product works with any Hi-Def source and supports resolutions up to 3840 x 2160 (4K x 2K). It features Fast Switching Technology, and supports HDCP, Deep Color, 3DTV pass-through, and lossless audio formats such as Dolby® TrueHD and DTS-HD® Master Audio™.

FST

Fast Switching Technology (FST) is a Gefen software implementation for HDMI products. FST eliminates the lengthy HDMI authentication process, and allows connecting/disconnecting or turning ON / OFF of HDTV displays without having these activities affect other displays in the same distribution system.

How It Works

Using the supplied HDMI cable, connect the Hi-Def source to the HDMI input on the 1:4 splitter. Connect up to four Ultra HD displays to the HDMI outputs. Connect the included locking power supply to the 1:4 Splitter and to an available electrical outlet. Apply power to the source and displays. The HD source signal will now be seen on all of the connected displays simultaneously.
