

## HTI-A-SP08

8" Multi-function speaker

### Features

- Full frequency speaker for conference use, with full mid frequency and extremely high vocal reproduction.
- Professional design of the box space, effective resonance with the unit, high frequency response, and high efficiency.
- Adopting high-quality units, high sensitivity, and high power.
- Accurate frequency division circuit, clear and transparent sound quality.
- The sound is clean and powerful, with a high degree of reproduction.
- The high-end and exquisite appearance showcases the wisdom of craftsmen.
- Circuit protection: high-frequency protection.

# Conference Audio System

| Technical Parameters         |                                       |
|------------------------------|---------------------------------------|
| System type                  | 1*8" two-way full-range speaker       |
| Tweeter                      | 25mm voice coil compression unit      |
| Woofers                      | 35mm voice coil driver                |
| Power output                 | 150W                                  |
| Peak power                   | 600W                                  |
| Nominal impedance            | 8Ω                                    |
| Nominal sensitivity          | 93dB(1W@1m)                           |
| Maximum sound pressure level | 120dB                                 |
| Frequency bandwidth          | 75Hz-19KHz (±3dB)                     |
| Material                     | CNC manufacturing, high-density board |
| Crossover Mode               | Passive                               |
| Connection                   | NLV4MP                                |
| Dimension                    | 240*255*400mm                         |
| Net Weight                   | 10kg                                  |
| Gross Weight                 | 11.1kg                                |
