

## HTI-A-SP205

5-inch Full Frequency Loudspeaker

### Features

- Full frequency speaker for conference use, with full mid frequency and extremely high vocal reproduction.
- Professional design of the box space, effective resonance with the unit, high frequency response, and high efficiency.
- Adopting high-quality units, high sensitivity, and high power.
- Accurate frequency division circuit, clear and transparent sound quality.
- The sound is clean and powerful, with a high degree of reproduction.
- The high-end and exquisite appearance showcases the wisdom of craftsmen.
- Circuit protection: high-frequency protection.

# Conference Audio System

Technical Parameters	
System type	2*5.25" Two-way full-range speaker
Tweeter	3" paper cone driver
Woofers	25mm voice coil driver
Power output	150W
Power output MAX	300W
Peak power	600W
Nominal impedance	8Ω
Nominal sensitivity	93dB(1W@1m)
Maximum sound pressure level	118dB
Frequency bandwidth	85Hz—18KHz
Material	CNC manufacturing, high-density board
Crossover Mode	Passive
Connection	Screw crimping terminal
Dimension	180*210*510mm
Net Weight	6.2kg
Gross Weight	7.4kg
