

HTI-BW240-C

240W IP Amplifier

hitrolink

FEATURES

- Distance with energy-saving detection module, power amplifier starts when there is signal input, no signal for 1 minute, power amplifier standby, standby power consumption $\leq 6W$.
 - With pass-through, energy-saving transfer switch, free switching.
 - The new Class D digital power amplifier is adopted, with an efficiency of more than 90%.
 - Rated power: 240W.
 - 100V, 70V constant voltage output or 4-16 ohm fixed resistance output.
 - 2* microphone input, 3*AUX input, 1* mixed output.
 - Independent volume control of each input channel, high and low tone control.
 - 5-unit LED level meter.
 - Digital short* protection technology, new intelligent DC fan control technology, dynamic limiting protection technology.
 - Video linkage with webcam.
 - It has a text broadcast module, and automatically broadcasts the input text content.
 - The network amplifier accepts the network AI voice intelligent call function.
 - The built-in network audio decoding module can realize 320kbps network transmission of high-quality MP3 audio signals with 16-bit CD sound quality.
-
