## Balanced microphone cable - flex $2 \times 0.22 \mathrm{~mm}^{2}-24$ AWG - <br> UltraFlex ${ }^{\text {TM }}$

## Product information

The PMC224 is a high-quality microphone cable with an ultra flexible outer jacket. Two 24 AWG ( $0.22 \mathrm{~mm}^{2}$ ) conductors consisting of 28 copper strands with 0.10 mm thickness are surrounded by a 80strand copper spiral shielding with superior coverage. In combination with the thick and soft PVC outer jacket, this provides a flexible but solid feel while making it able to withstand an extreme amount of bending cycles. An optimal signal transmission is guaranteed due to the low capacitance and use of high-purity copper, while the high-coverage shielding provides a great immunity against interference. These features make the PMC224 perfect for use in professional stage \& studio applications.

## Highlights

- Ultraflex ${ }^{\text {TM }}$ Ultra flexible jacket
- 24 AWG thin and dense stranded conductors
- $6.5 \mathrm{~mm}(\varnothing)$ outer diameter
