

S 15a More bass. Less space.

S 15a is a compact, high-performance self-powered touring subwoofer, designed to accompany our VENU series in a wide range of sound reinforcement applications requiring high SPL in a discreet, compact package.

S 15a houses a long excursion 15" neodymium driver in a bass-reflex and T-lined design and has the versatility to be deployed stand-alone, stacked or flown.

An advanced AUDIOFOCUS Class D amplifier module with integrated DSP and versatile presets allows S 15a to be quickly deployed in any configuration, including cardioid and end-fire.

S 15a is built with pride in Belgium and coated in tough, weather-resistant polyurea to safeguard your investment. The cabinet front is protected by a rigid metal grill, backed by acoustically transparent foam.

Up to 5.000

Complete solution

Omni and Cardioid

38Hz to 110Hz
