

2 channels cable cross

Product Code: SG CABLECRS2

2 channels cable cross for cable routing, up to 30mm section.

Description

2 channels cable cross for cable routing, up to 30mm section. The thermoplastic polyurethane, the material chosen for its realization, guarantees to the platform the maximum resistance and a reasonable weight. The closing panel, made of yellow PVC, is equipped with an effective non-slip texture, connected to the platform through a useful junction zipper, designed to quickly install or inspect the underlying conduits.

Technical Specifications

Description

- 2 channels cable cross
- Conduits for cable routing up to 30mm section
- Base made of thermoplastic polyurethane
- Closing panel: made of yellow PCV
- Capacity: ≤ 3000 kg (uniformly distributed load)
- Conduits measures: 1000x30x30 mm
- Platform measures: 1000x45x250 mm
- Weight: 4.0 kg
