

Hybrid H-900

Product Code: SG HYH900

Hybrid smoke and hazer machine

Description

Hybrid machine that allows to make fog and smoke with a single H tipology device studied for the SDJ world. Within its compact body we find a machine with features inherited from live professional entertainment world. HYH900 guarantees perfect coverage of medium and small sized environments indoor and outdoor; its new technology uses an air pump that besides allowing an optimal mixing between air and smoke, also guarantees an extreme cleaning of the heating conduit, avoiding those annoying blockages resulting from normal limestone formations in the liquid environments. To a powerful jet combines a dry thin and fog effect, which does not prevent the visibility to the audience and thanks to a powerful speed- controlled internal fan can saturate the environment in the short term. The machine is equipped with a DMX control, a manual mode called up from the control panel that allows starting or stopping of the effect.

Technical Specifications

Effects

· Hazer/smoke effect

Control and programming

- 1 DMX channels configuration: 2 channels
- Fan's speed adjustable via software and via DMX
- Protocol USITT DMX 512
- · Heating time: 5 mins
- Continue output
- · Manual mode adjustable via display

Structure and cabinet

- · Metal black housing
- LCD blue graphic display
- Confortable handle for transportation
- High performance pump for optimal emission
- · High speed axial fan
- External tank: 2 litres
- 3/5 poles XLR in/out connection
- IP rating: IP20
- For best applications and correct function we recommend using Sagitter fluids

Power supply

- Input Voltage: AC~230V 50HzPower consumption 900W
- IN power connection with VDE sockets
- Power supply cable 1,5 mt included

Weight and dimensions

• Net weight: 10,4 kg

• Dimensions: 425x480x330 mm
