

Connector

TS-0321

Feature:

- * Support network extension function.
- * Support power supply function.
- * Connect the controller and the unit. The last unit is connected back to the controller to realize the loop redundancy function.
- * When the loop detection is disconnected, the ACTIVE indicator light is on.
- * When the loop detection is closed, the ACTIVE indicator light is off.
- * Support self-checking function. When internal self-checking fault occurs, the ERROR indicator light stays on, and it goes out when the fault is solved or there is no fault.
- * Connected to a power adapter for power supply.

Specification:

Model	TS-0321
Power consumption	1.8W
Supply voltage/current	36V/2A
Connection method	Special cable (6-pin aviation cable)
Color	Silver
Weight	660g
Dimension	180*111*40mm
Working temperature	0~60°C
Relative humidity	20%~80%, no condensation
