**USER
GUIDE**

IMPORTANT SAFETY SYMBOLS

The symbol is used to indicate that some hazardous live terminals are involved within this apparatus, even under the normal operating conditions, which may be sufficient to constitute the risk of electric shock or death.

The symbol is used in the service documentation to indicate that specific component shall be replaced only by the component specified in that documentation for safety reasons.

Protective grounding terminal

Alternating current/voltage

Hazardous live terminal

ON: Denotes the apparatus is turned on

OFF: Denotes the apparatus is turned off.

WARNING: Describes precautions that should be observed to prevent the danger of injury or death to the operator.

CAUTION: Describes precautions that should be observed to prevent danger of the apparatus.

1. IMPORTANT SAFETY INSTRUCTIONS

- **Read these instructions.**
- **Keep these instructions.**
- **Heed all warning.**
- **Follow all instructions.**

• **Water & Moisture**

The apparatus should be protected from moisture and rain, can not used near water, for example: near bath-tub, kitchen sink or a swimming pool, etc.

• **Heat**

The apparatus should be located away from the heat source such as radiators, stoves or other appliances that produce heat.

• **Ventilation**

Do not block areas of ventilation opening. Failure to do could result in fire. Always install accordance with the manufacturer's instructions.

• **Object and Liquid Entry**

Objects do not fall into and liquids are not spilled into the inside of the apparatus for safety.

• **Power Cord and Plug**

Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.

Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong is provided for your safety. If the provided plug does not fit into your outlet, refer

to electrician for replacement.

• **Power Supply**

The apparatus should be connected to the power supply only of the type as marked on the apparatus or described in the manual. Failure to do could result in damage to the product and possibly the user.

Unplug this apparatus during lightning storms or when unused for long periods of time.

Where the MAINS plug or an appliance coupler is used as the disconnect device, the disconnect device shall remain readily operable.

• **Fuse**

To prevent the risk of fire and damaging the unit, please use only of the recommended fuse type as described in the manual. Before replacing the fuse, make sure the unit turned off and disconnected from the AC outlet.

• **Electrical Connection**

Improper electrical wiring may invalidate the product warranty.

• **Cleaning**

Clean only with a dry cloth. Do not use any solvents such as benzol or alcohol.

• **Servicing**

Do not implement any servicing other than those means described in the manual. Refer all servicing to qualified service personnel only.

• Only use accessories/attachments or parts recommended by the manufacturer.

DSP Function Introduction

V6A

LEVEL 00dB		←	Level adjustment: -60dB~00dB
IN		←	Level indication: level/limit/clip indication
EXIT		←	Exit
MODE:	NORMAL	←	Mode: HF 0dB, HF+3dB, HF+6dB, HF-3dB, custom
LOW OUT:	OFF	←	Low cut: OFF、80、100、120、150
HIGH EQ:	0dB	←	HF Eq: ±12dB
MID EQ:	0dB	←	MF Eq: ±12dB
LOW EQ:	0dB	←	LF Eq: ±12dB
DELAY:	OFF	←	Input delay: 0~16mS
LCD DIM:	ON	←	LCD DIM: ON-OFF
BRIGHT:	5	←	Contrast: 0~10
CONTRAST:	5	←	Bright: 0~10
ADDRESS:	1	←	RS-485 Address: 0~255
RESET		←	Reset
INFO		←	Production information
EXIT		←	Exit

V6SA

LEVEL 00dB		←	Level adjustment -60~00dB
IN		←	Level indication: level/ limit/ clip indication
EXIT		←	Exit
MODE:	NORMAL	←	Mode: normal、 outdoor、 custom
DELAY:	OFF	←	Input delay: 0~16mS
LCD DIM:	ON	←	LED DIM: ON-OFF
BRIGHT:	5	←	Contrast: 0~10
CONTRAST:	5	←	Bright: 0~10

EXIT		←	Exit

V6A panel

- 1). LCD DISPLAY: LCD displays signal level, mode, 3 band EQ, low cut, delay, etc.
- 2). LINE INPUT: bal XLR to connect with the line out connector of CD player or mixer.
- 3). NETWORK CONNECTOR
- 4). PARALLEL: bal XLR to parallel with INPUT connector to relay signal with another active speaker cabinet or other equipments.
- 5). MASTER VOL/PRE-SET: normally it adjusts master volume. Press once to enter menu, and select the function on LCD to adjust (mode, 3 band EQ, low cut, delay, etc.)
- 6). AC MAIN: power socket;
- 7). AC LINK: power socket to link with next speaker cabinet.

Mounting: rack-hanging

Introduction

V6A series cabinets are multi-purpose plastic line array speakers including passive and active. The full frequency main speaker is made of high-strength PP composite. Active series main speaker and subwoofer adopt amp integrated design, in small size and light weight. Built-in DSP module have gain, crossover, equalization, delay, limit, program memory and other functions. With a number of preset calls, the DSP module control all speakers network through the 485 network interface. The speaker cabinet is convenient to install and can be adjusted independently. This series fits many kinds of sound reinforcement projects.

This line array features 70Hz-20KHz frequency, flat frequency response and phase response, one 3 inch HF compression unit and two 6.5 inch LF units offer high headroom. Each speaker cabinet has a high power power amp and DSP. The speaker cabinet can be adjusted independently. The speaker cabinet quantity can be configured according to actual requirements.

The 6.5 inch LF unit of the line array uses imported cone. HF part uses one 3 inch HF compression unit. They converts HF dome wave into the same phase plane wave to reduce the HF interference, and to improve the sound clearness at lone distance. With the 120 degree constant directivity horn together, they generate consistent wavefront. The power amplifier uses high efficiency switching mode power supply, DSP module, for crossover ,EQ, limit, delay, volume functions. DSP can be operated on the panel.

The enclosure uses PP composite, light and sturdy. The line array cabinets are trapezoidal to reduce the gap between two cabinets to minimum, thus to reduce the unwanted sound area, and to minimize the side lobe. The line array uses accurate AI suspension system. The cabinet angle can be adjusted in a range 0°- 10°to meet the requirement of different applications.

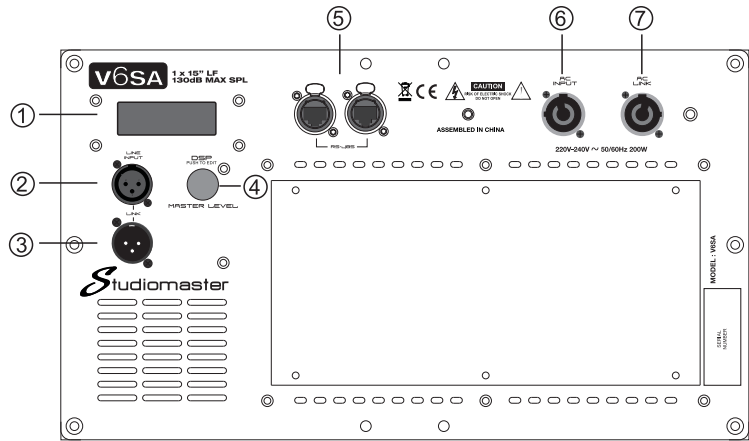

The V6SA line array cabinets features 40Hz-150KHz frequency, one powerful 15 inch LF unit. The speaker cabinet has a seperate powerful amp and DSP. The speaker cabinet can be adjusted independently. The speaker cabinet quantity can be configured according to actual requirements.

Application:

- * tour events
- * large/medium/small stadium
- * theatre and auditorium, etc

Function Introduction

V6SA panel

- 1). LCD DISPLAY: LCD displays signal level, mode, 3 band EQ, low cut, delay, etc.
- 2). LINE INPUT: bal XLR to connect with the line out connector of CD player or mixer.
- 3). PARALLEL: bal XLR to parallel with INPUT connector to relay signal with another active speaker cabinet or other equipments.
- 4). MASTER VOL/PRE-SET: normally it adjusts master volume. Press once to enter menu, and select the function on LCD to operate (mode,3 band EQ, low cut, delay, etc.)
- 5). NETWORK CONNECTOR
- 6). AC MAIN: power socket;
- 7).AC LINK: power socket to link with next speaker cabinet.

Specification

Model	V6A
Type	2-way active line array full range
Frequency response	70Hz~20kHz
Horizontal coverage(-6dB)	100°
Vertical coverage(-6dB)	10°
LF unit	2×6.5" ferrite MF and LF unit
HF unit	1x3"compression driver
Amp power	400W+150W
Max SPL	130dB
Input sensitivity	0dB
Voltage	230V/115V
Dimension (W×H×D)	470x207x341 (mm)
Weight	15kg
material	PP composite

Model	V6SA
Type	active signal 15"subwoofer
Frequency response	40Hz~150kHz
LF unit	1×15" ferrite LF unit
Amp power	1200W
Max SPL	130dB
Input sensitivity	0dB
Voltage	230V
Dimension (W×H×D)	474×506×673 (mm)
Weight	41kg
Material	Birch plywood
