ClearOne®

Versa® USB22D
Dante® to USB Adapter

Versa USB22D lets you connect any computer to a Dante network with no software installation and can be used with any audio application for playback or capture, making it ideal for conference rooms, classrooms, and lecture halls.

Versa USB22D enables any computer to be used with the ClearOne BMA 360D ceiling tile beamformer.

> Supports 2x2 channels of bidirectional audio, allowing PCs and mobile devices to playout and capture audio with Dante-enabled devices over a standard IP network.

> Automatically discover and natively configure using Audinate® Dante® Controller software.

> Built-in support for Dante Audio over IP and AES67 RTP transport formats.

> Includes cables to connect to a USB C host port and a USB Type A host port.

> Power with the USB port on a computer or with a PoE (Power over Ethernet) switch—a separate power supply is not needed.

> Delivers bit-perfect audio reproduction, super-low latency, and sample-accurate synchronization across the entire Dante network.

> Works seamlessly with Dante-enabled devices including ClearOne DSP mixers, Wireless Microphones, and Beamforming Microphones.
> Dante Domain Manager ready.
