### ► Applications

- Public buildings
- Business offices
- Warehouses
- Shops
- Hotels
- Restaurants

The WS serie is AUDAC's range of in-wall speakers, designed for any possible application. Whenever there's need for a sound system without obvious speakers, the WS series offer a perfect solution to integrate your soundsystem seamlessly into your wall's.

The WS500 is the designer wall loudspeaker of this range, with a curved shape of white ABS and a white coated aluminium grill.

The beautiful curved shape of this speaker makes it possible to integrate it perfectly into any environment.

The WS500 is suitable for speech and music, and has a 6 1/2" moisture-proof broadband loudspeaker of 10 Watt. Due to the moisture-proof treatment of the speaker cone, this speaker is suitable for indoor as well as outdoor applications.

Because of the curved WS500's body, there will be a greater coverage of the sound, which ensures that the sound will be spread nicely into bigger rooms.

The speaker is standard fitted with a 100 Volt line transformer and connections for different powers:

- 10 Watt @ 100 V
- 5 Watt @ 100 V

The connections can be made at the rear side of the loudspeaker, by means of three cable clamps.

### ► Specifications

SYSTEM SPECIFICATIONS	
RMS power	10 W
Line Transformer Power Tap 1	10 W / 1000 Ohm
Line Transformer Power Tap 2	5 W / 2000 Ohm
Frequency response -3dB	150 Hz - 15 KHz
Sensitivity 1 W / 1m	92 dB
SPL Max W / 1m	102 dB
