

Features

- 24 Watt (WTR24) & 6 Watt (WTR06)
- Three different power taps
- Waterproof AWX5 Input connector
- 8 Ohm output impedance
- Over Dimensioned core
- Water & Dust proof housing (IP66)
- 0.5 Meter connection cable (2 sides)

Applications

- Impedance matching Low Impedance Loudspeakers and 100 Volt Public Address Amplifiers

Two different versions are available for a maximum output power of 24 Watt (WTR24) and 6 Watt (WTR06) with different power taps for 100%, 50% and 25% of the total output power.

The housing is designed to be water and dust proof, while making it possible to be hidden at any location such as above the false ceilings, in a wall junction boxes, in hollow places inside walls, ...

The primary connection (100V side) is performed using a special designed waterproof AWX 5 connector whereby the desired power tap can be selected depending on the rotation of the connector. The secondary connection (8 Ohm side) is performed using a waterproof cable gland. A connection cable with a length of 0.5 meter is provided on both sides of the transformer.

The over dimensioned core of the transformers limits the saturation to a minimum and gives a remarkable improvement of the sound reproduction, especially in the low frequency range.

All these features make these transformers comply to an Ingress Protection rating of IP66.

WTR24: 24 Watt @ 100 Volt (24 / 12 / 6 Watt Power Taps / 8 Ohm output)

WTR06: 6 Watt @ 100 Volt (6 / 3 / 1.5 Watt Power taps / 8 Ohm output)

SYSTEM SPECIFICATIONS

	WTR06	WTR24
Line Transformer taps	6 W / 1667 Ohm	24 W / 417 Ohm
	3 W / 3333 Ohm	12 W / 833 Ohm
	1.5 W / 6667 Ohm	6 W / 1667 Ohm
Output impedance	8 Ohm	8 Ohm
PRODUCT FEATURES		
	WTR06	WTR24
Construction	ABS	
Colour	Black	
Input connection (100 Volt)	AWX5 Connector (0.5 m Cable)	
Output connection (8 Ohm)	Waterproof cable gland (0.5 m Cable)	
Dimensions (Width x Height x Depth)	58 x 58 x 82 mm	
Weight net	0.300 Kg	0.375 Kg
SHIPPING & ORDERING
