- True to nature sound reproduction
- Included mounting bracket
- Available in Black and White
- Vertical and Horizontal mounting

► Applications

- Residential applications
- Retail stores
- Clubs
- Pubs
- Restaurants
- ...

The XENO series is a loudspeaker range specifically designed for fixed audio installations in modern environments, offering two different sizes of contemporary and elegant designed products. What makes them so unique is their full range audio design, allowing them to be used without additional bass cabinet.

The XENO 8 is the 8" version, with a 1" dome tweeter and a 8" Mid / Low frequency driver, ensuring a true-to-nature, high-fidelity reproduction of music and speech. This wooden cabinet is fitted with a slim and elegant front grill.

This makes the loudspeaker suitable for environments where the music is the key element, but without making any compromises on its design.

This ranges from modern and trendy clubs to pubs and dance bars where that little extra punch and depth in the music is appreciated. The sleek and elegant design guarantees the loudspeaker to blend in with any environment.

It delivers a powerful full range sound with an RMS rating of 120 Watt, and a maximum of 240 Watt. The advanced integrated protection circuit avoids tweeter damaging when overload occurs.

The included mounting bracket makes it possible to mount the loudspeaker in both horizontal and vertical position, making it suitable for every application.

The connections can be made on the rear side of the loudspeaker with an Euro Terminal block connector.

All Xeno series speakers are available in Black (/B) or White (/W).

► Specifications

SYSTEM SPECIFICATIONS		
Max power	240 W	
RMS power	120 W	
Impedance	8 Ohm	
Sensitivity 1W/1m	89 dB	
Sound pressure Max W/1m	110 dB	
Frequency response -3dB	60 Hz - 18 kHz	
Frequency range -10dB	50 Hz - 20 kHz	
Cross-over frequency	2.5 kHz	
Crossover network	Passive built-in
