## Highlights:

- 11 AWG (4 mm²) thin and dense stranded conductors
- EN50399 CPR Euroclass Cca-s1b,d0,a1
- Class 5 IEC 60228 compliant

The CLS440-Cca is a 4-core installation loudspeaker cable compliant to the Cca standard of the Construction Product Regulation (CPR) regarding fire and flammability resistance in fixed installations, minimizing toxic smokes and providing optimal resistance to spreading fire.

In addition to its outstanding fire properties, the outer jacket of the cabling is smooth and durable for easy installation and pulling. The cable consists of individually polyolefin isolated conductors with a section of $4 \times 4.0 \mathrm{~mm}^{2}$ ( 11 AWG) which are composed out of stranded bare copper wires. The stranding keeps the cable flexible and easy to handle. The cable can be used both indoor and outdoor or in humid environments.
