2 Getting Started

We recommend that you:

- Unpack the equipment carefully and save the original box and packaging materials for possible future shipment
- Review the contents of this user manual

Go to www.kramerav.com/support/product_downloads.asp to check for up-to-date user manuals, application programs, and to check if firmware upgrades are available (where appropriate).

2.1 Achieving the Best Performance

To achieve the best performance:

- Use only good quality connection cables (we recommend Kramer high-performance, high-resolution cables) to avoid interference, deterioration in signal quality due to poor matching, and elevated noise levels (often associated with low quality cables)
- Do not secure the cables in tight bundles or roll the slack into tight coils
- Avoid interference from neighboring electrical appliances that may adversely influence signal quality
- Position your Kramer **673T**, **673R** away from moisture, excessive sunlight and dust

This equipment is to be used only inside a building. It may only be connected to other equipment that is installed inside a building.

2.2 Safety Instructions

Caution: There are no operator serviceable parts inside the unit

Warning: Use only the Kramer Electronics input power wall adapter that is provided with the unit

Warning: Disconnect the power and unplug the unit from the wall before installing

Warning: Avoid direct eye exposure into the optic connectors when powered, although this product is regulated strictly enough to operate under the Laser Class 3R for eye safety

2.3 Recycling Kramer Products

The Waste Electrical and Electronic Equipment (WEEE) Directive 2002/96/EC aims to reduce the amount of WEEE sent for disposal to landfill or incineration by requiring it to be collected and recycled. To comply with the WEEE Directive, Kramer Electronics has made arrangements with the European Advanced Recycling Network (EARN) and will cover any costs of treatment, recycling and recovery of waste Kramer Electronics branded equipment on arrival at the EARN facility. For details of Kramer's recycling arrangements in your particular country go to our recycling pages at www.kramerav.com/support/recycling/.

3 Overview

The **673T** is a high-performance fiber optic transmitter for 3G HD-SDI, HD-SDI, SDI, and dual-link SDI signals. The unit converts up to four channels of serial digital signals on gold-plated BNC connectors to light pulses that are transmitted over a single multimode fiber optic cable to a **673R** receiver that converts them back to serial digital signals. The **673T** and **673R** pair has a transmission range of 1000 meters (more than 3,200ft).

Both the **673T** and **673R**:

- Feature a maximum data rate of up to 3Gbps, enabling it to be used for standard definition, high definition and the new 3G high definition serial digital video signals (SD/HD-SDI)
- Feature a single multimode OM3 fiber optic with SC connectors
- Include four HD-SDI signals on gold-plated BNC connectors each for the transmitter and the receiver
- Support SDI, HD-SDI, 3G HD-SDI and dual-link and support data rates of 270Mbps, 1483.5Mbps, 1485Mbps and 2970Mbps
SDI pathological patterns are not supported for SMPTE 259M, SMPTE 344M, SMPTE 292M, or SMPTE 297-2006 serial rates
- Are strictly regulated in accordance with Class 3R Laser Eye Safety in compliance with ANSI Z136 and IEC 60825-1:2007
- Feature HDTV compatibility
- Include cable equalization up to 350m for SD signals, 140m for 1.5GHz HD signals, and 120m for 3GHz HD signals
Standard Definition (SD) means an NTSC or PAL compatible video format, consisting of 480 (for NTSC) or 576 (for PAL) lines of interlaced video. High Definition (HD) means a video format, consisting of 720 active lines of progressive video or 1080 lines of progressive or interlaced video
