KRAMER

PS-4812 Installation Sheet

This guide helps you install and use your **PS 4812** external PoE power supply for the first time.

Go to www.kramerav.com/downloads/PS-4812 to download the latest user manual.

PS-4812 is a power supply add−on that enables PoE powering of devices connected to **VS-34FD** modular matrix.

(i) All normal static discharge precaution measures must be observed to prevent damage to the equipment.

To install PS-4812:

1. Power off **VS-34FD** and all devices connected to it.
2. Remove the new power supply from its shipping box and anti-static bag. Reserve the original packaging including the anti-static bag for future use.
3. Install **PS-4812** in the 19" rack, in the space above or below **VS-34FD.**
4. Connect the **PS-4812** round power connector to the port on the rear panel of **VS-34FD.**
5. Connect the AC power connector to the included power cord and to the AC power source.
6. Power on **VS-34FD** and peripheral devices.

Safety Instructions

(!) **Caution:** There are no operator serviceable parts inside the unit.
Warning: Use only the power cord that is supplied with the unit.
Warning: Do not open the unit. High voltages can cause electrical shock! Servicing by qualified personnel only.
Warning: Disconnect the power and unplug the unit from the wall before installing.
See www.kramerav.com for updated safety information.
