

# Port-O

in desk power module

## USER

# MANUAL

Thank you for purchasing ABL's Port-O power module. Port-O has been manufactured and tested in accordance with relevant standards (see contact page).

### INSTALLATION:

Make 54 mm cutout. Ensure that there is a sufficient clearance below surface and between the cut-out edge and the edge of the work surface.

1. Unclip the ring and place the module in the cutout
2. Turn the screw clamp clockwise till the fascia is flush with the surface
3. Secure the ring on the grommet fascia

### MAIN FEATURES:

- The module is available in Black or White, with Black profile
- Available in variations of UK socket, Schuko socket, USB charger and one or two media connections
- Rated voltage of Port-O power module unit is 250V AC (**G, F type socket**)
- Nominal intensity of the unit:
  - 3,15A or 5A for **G type socket**
  - 16A for **F type sockets**
- Power of Port-O with USB A+C charger:
  - 35 W Max (for USB A+C 35W)
  - 65 W Max (for USB A+C 65W)
- G type sockets are individually fused with 3.15A or 5A fuse.

• Fit into a 54 mm port hole, and desk thickness between 10 mm and 40 mm

• Locking ring enables quick installation and fitting with no effort

Contact us for more information.

### SAFETY NOTES:

- Items such as Vacuum Cleaners, Kettles, Coffee Makers, and Fan Heaters should not be connected via these power modules
- Installation is to be carried out by a qualified professional
